SUMMARY

Computer Science Engineering student (4th Year) specializing in AI, Machine Learning, and Software Development. Experienced in building AI-powered applications and web solutions using Python, JavaScript, and Generative AI technologies. Skilled in LLMs, API integration, automation workflows, and developing scalable solutions through industry internships and real-world projects.

EDUCATION

B.Tech in Computer Science & Engineering
Veer Madho Signh Bhandari Uttarakhand Technical University
Senior Secondary (XII)- CBSE
Universal Convent Senior Secondary School

2023-Present
CGPA: 8.08 / 10

EXPERIENCE

AI Automation & Intelligent Solutions Intern
BharatCares – IBM SkillsBuild | AICTE
June 2026 – July 2026

- Completed a 6-week internship in AI Automation, Generative AI, Prompt Engineering, and Intelligent Workflows.
- Developed Carevo AI, an AI career copilot for job description analysis, resume evaluation, skill-gap analysis, and personalized career recommendations.
- Built AI-driven workflows using Python, FastAPI, Gemini AI, n8n, React.js, and Supabase to automate career-preparation processes.
- Presented and demonstrated the project during the internship's project evaluation and pitch process.

Project Management Intern
Simtrak Solutions | July 2026 – Present
July 2026 – Present

- Coordinate project tasks, planning, documentation, team communication, and progress tracking across multiple projects.
- Conduct market research, startup research, lead generation, prospect outreach, and business development activities.
- Develop website content, marketing content, branding materials, and promotional strategies to support business and digital initiatives.
- Collaborate with team members and management to monitor deliverables, communicate updates, and support timely project execution.

PROJECTS

Carevo AI – AI Career Copilot
Tech Stack: React.js, FastAPI, Python, Supabase, Gemini AI, n8n

- Developed an AI-powered career platform for job description analysis, resume evaluation, and ATS compatibility scoring.
- Implemented skill-gap analysis and personalized career recommendations using Generative AI.
- Built automated AI workflows using Gemini AI, n8n, FastAPI, and Supabase for career guidance and application tracking.

MisinfoX – AI Powered Browser Extension
Tech Stack: JavaScript, Chrome APIs, HTML, CSS

- Developed a Chrome extension for misinformation detection using JavaScript and browser APIs.
- Implemented AI-based text analysis and credibility scoring to evaluate online content.
- Designed a privacy-focused workflow to improve user trust and data handling.

AAO LO -Restaurant Finder
Tech Stack: HTML, CSS, JavaScript

- Developed a location-based restaurant discovery web application using HTML, CSS, and JavaScript.
- Implemented smart filtering to help users efficiently discover restaurants based on their preferences.
- Reduced reported user decision time by 60% through streamlined search and filtering.

SKILLS

Languages: Python, C++, Java, JavaScript, SQL
Web & APIs: HTML, CSS, Node.js, REST APIs
AI & Automation: Generative AI, LLMs, AI Agents, NLP, Prompt Engineering, AI Automation
Databases: PostgreSQL, Supabase
Tools & Platforms: Git, GitHub, n8n, CloudHQ, Gemini AI, AWS

CERTIFICATIONS

- Making AI Agents Work for You – IBM
- AI Automation & Intelligent Solutions – IBM SkillsBuild / BharatCares
- Fundamentals of Artificial Intelligence – MSDE Skill India
- AWS Solutions Architecture - Forage
- Generative AI-LinkedIn
- Fundamentals of Python Programming -IIT KanpuR

ACHIEVEMENTS & SOFT SKILLS

- Leadership & Achievements**
- VP, Social Media Club: Increased engagement by 85% through content strategy.
 - Class Representative: Coordinated communication for 75+ students.
 - Hackathon Finalist: Qualified in state-level and inter-college hackathons.
 - College Anchor: Hosted events for 100+ attendees.
 - Lead Designer & Videographer: Created 13+ creatives generating 664K+ views..
